Analytics & User Adoption Tracking Requirements

Purpose

Define analytics, adoption tracking, engagement monitoring, champion user identification, and weekly reporting requirements across all E4H applications and dashboards.

1. Applications in Scope

- Saura-eMitra
 - E4H Field Assist – Installation and AMC
 - Kibana Dashboards
 - E4H Management Hub
-

2. Roles in Scope

- CRM
 - State SPOC
 - Vendor
 - HCR
 - Tech PoC
 - AMC Field Staff
 - AMC Reviewer
 - Field Staff
 - Field Supervisor
 - Installation Reviewer
 - Project Manager
 - Facility Admin
 - SPM (TBD)
 - Central Program Team (TBD)
-

3. Role-Based Analytics and Benchmarking

All adoption, engagement, usage, and champion user metrics shall be measured and reported at a role level.

Given the significant differences in responsibilities, expected platform usage, and workflows across user roles, direct comparison of usage metrics between different roles may lead to inaccurate conclusions.

Accordingly:

- Users shall be benchmarked against other users within the same role.
- Champion Users shall be identified separately for each role.
- Active User metrics shall be calculated independently for each role.
- Usage patterns, page access frequency, session counts, and feature adoption metrics shall be analyzed within the context of the user's role.
- Reports shall provide role-wise analytics in addition to consolidated platform-level views.

Additionally, analytics shall distinguish between Internal Users and External Users.

Internal Users

- CRM
- State SPOC
- Tech PoC
- AMC Reviewer
- Installation Reviewer
- Project Manager
- Facility Admin
- SPM
- Central Program Team

External Users

- Field Staff
- Field Supervisor
- AMC Field Staff
- Vendor
- HCR

Where relevant, reports shall provide separate adoption and usage summaries for Internal Users and External Users.

Benchmarking and Champion User identification shall be performed within the respective role categories and shall not compare users across different roles.

4. Business Objectives

- Measure platform adoption.
 - Measure user engagement.
 - Track application usage patterns.
 - Identify Champion Users.
 - Provide weekly user access insights.
-

5. Functional Requirements

The system shall:

- Track every successful login/access across all applications.
 - Track Weekly Active Users (WAU).
 - Track users by State and Role.
 - Track all pages/modules accessed.
 - Track frequency of page and module access.
 - Track session counts per user.
 - Track user-wise access frequency.
 - Generate Champion User rankings by role.
 - Generate weekly reports.
-

6. Mandatory Events to Capture – Platform Wise

Saura-eMitra

Capture the following events:

- Login
 - Logout
 - Page Viewed
 - Ticket Viewed
 - Ticket Updated
-

E4H Field Assist

Capture the following events:

- Login
 - Logout
 - Module Accessed (Installation / AMC)
 - Report Submitted
 - Page Viewed
 - Report Viewed
-

Kibana Dashboards

Capture the following events:

- Login
 - Logout
 - Dashboard Viewed
 - Tables Downloaded
-

E4H Management Hub

Capture the following events:

- Login
 - Logout
 - Facility Added
 - Boundary Added
 - Project Created
 - Field Plan Created
 - AMC Scheduled
 - Report Approved
-

7. Metric Definitions

Active User

User with at least one login during the reporting period.

Weekly Active User (WAU)

User with at least one login during a week.

Champion User

Top users within a role based on platform usage during the reporting period.

Top 5 Champion Users shall be ranked using the following parameters:

- Login Count
- Session Count
- Page Access Count
- Application Actions Performed (where applicable)

Champion User identification shall be performed within the user's role and shall not compare users across different roles.

Usage Count

Total number of successful logins/accesses during the reporting period.

Page Access Count

Total number of times a page or module was accessed during the reporting period.

8. Weekly Report Requirements

The weekly report shall include:

Executive Summary

- Total Active Users by Application
- Total Login Count by Application
- Week-on-Week Growth Percentage by Application

Adoption

- WAU by State
- WAU by Role
- WAU by Internal vs External User Category

Usage Analytics

- Number of times each user accessed the application during the week
- Main pages accessed by each user
- Top 10 Pages Accessed
- Top 10 Modules Accessed

- Average Sessions per User

Champion Users

- Top Champion Users by Role
 - Top Champion Users by Application
-

9. Expected Weekly Excel Report Structure

E4H_Leadership_Analytics_Template.xlsx

Deliverable Frequency

The above report shall be generated and shared on a weekly basis.
