

Analytics & User Adoption Tracking Requirements

Purpose

Define the requirements for role-based usage analytics, champion user identification, and weekly reporting based on meaningful system-level activities across E4H applications.

1. Applications in Scope

- Saura-eMitra
- E4H Field Assist – Installation and AMC
- Kibana Dashboards
- E4H Management Hub

2. Roles in Scope

- CRM
- State SPOC
- Vendor
- HCR
- Tech PoC
- AMC Field Staff
- AMC Reviewer
- Field Staff
- Field Supervisor
- Installation Reviewer
- Project Manager
- Facility Admin
- SPM
- Central Program Team

3. Role-Based Analytics and Benchmarking

All analytics, engagement metrics, and Champion User identification shall be measured and reported at a role level.

Given the significant differences in responsibilities and workflows across user roles, direct comparison between different roles may lead to inaccurate conclusions.

Accordingly:

- Users shall be benchmarked only against users within the same role.
- Champion Users shall be identified separately for each role.
- Active User metrics shall be calculated independently for each role.
- Reports shall provide role-wise analytics in addition to consolidated platform-level views.

Additionally, analytics shall distinguish between **Internal Users** and **External Users**.

Internal Users

- CRM
- State SPOC
- Tech PoC
- AMC Reviewer
- Installation Reviewer
- Project Manager
- Facility Admin
- SPM
- Central Program Team

External Users

- Vendor
- HCR
- AMC Field Staff
- Field Staff
- Field Supervisor

Where relevant, reports shall provide separate usage summaries for Internal Users and External Users.

4. Business Objectives

The system shall enable:

- Measurement of application usage through business activities/actions taken.
- Identification of Champion Users.
- Weekly role-wise usage reporting.
- Platform adoption insights.
- Role-based benchmarking.

5. Functional Requirements

The system shall:

- Track Weekly Active Users (WAU).
- Track Active Users by Role.
- Track Active Users by State.
- Generate Champion User rankings by role.
- Generate weekly analytics reports.
- Support Internal vs External User reporting.

6. System-Level Activities to Capture

Analytics shall be generated based on business activities performed within each application.

Saura-eMitra

Capture the following activities :

- Ticket Creation
- Ticket Assignment
- Vendor Responses
- Ticket Updation
- Ticket Resolution
- Escalation Raised
- Approval Actions
- Tech PoC Actions

- State SPOC Actions

E4H Field Assist

Capture the following activities:

- Installation Report Submitted
- AMC Report Submitted
- Installation Report Approved
- Installation Report Rejected
- Installation Reports Re-submitted
- AMC Report Approved
- AMC Reports Re-submitted
- AMC Report Rejected

Kibana Dashboards

- Track log in/log out for users

E4H Management Hub

Capture the following activities:

- Project Created
- Field Plan Scheduled
- Facility Added
- PoC Details Edited
- Boundary Added
- AMC Scheduled

7. Metric Definitions

Active User

A user who performs at least one system-level activity during the reporting period.

Weekly Active User (WAU)

A user who performs at least one system-level activity during a given week.

Champion User

Champion Users shall be identified based on business activities performed within the application.

Examples include:

- Tickets Created
- Tickets Assigned
- Tickets Resolved
- Reports Submitted
- Reports Reviewed
- Approvals Completed
- Facilities Added
- Projects Created
- AMC Scheduling Activities

Champion User identification shall:

- Be role-specific.
- Be configurable based on the application.
- Never compare users across different roles.

Top 5 Champion Users shall be identified for each role.

8. Weekly Report Requirements

The weekly report shall include:

Executive Summary

- Total Active Users by Application
- Week-on-Week Active User Growth

- Active Users by Role
- Active Users by State
- Active Users by Internal vs External User Category

Usage Analytics

Application-wise activity summaries :

Saura-eMitra

- Ticket Creation
- Ticket Assignment
- Vendor Responses
- Ticket Updation
- Ticket Resolution
- Escalation Raised
- Approval Actions
- Tech PoC Actions
- State SPOC Actions

Field Assist

- Installation Report Submitted
- AMC Report Submitted
- Installation Report Approved
- Installation Report Rejected
- Installation Reports Re-submitted
- AMC Report Approved
- AMC Reports Re-submitted
- AMC Report Rejected

Management Hub

- Project Created
- Field Plan Scheduled
- Facility Added
- PoC Details Edited
- Boundary Added
- AMC Scheduled

Champion Users

- Top Champion Users by Role
- Top Champion Users by Application

Adoption Insights

Where applicable, overall application usage insights (such as page visits by region or role) may be obtained through Google Analytics.

9. Analytics Source

- Champion User identification shall be based on application transaction data.
- Role-based analytics shall be derived from system-level activities.
- High-level application usage trends may be obtained through Google Analytics where required.
- Detailed user-level UI interaction tracking (such as page visits, session duration, or clickstream analysis) is out of scope for this phase.

10. Deliverables

Weekly Deliverable

- Role-wise Analytics Report
- Champion User Report
- Application-wise Usage Report
- Weekly Executive Summary

Format

- Excel Report to be shared through email every week at 6am on Mondays
- Email recipient- huda@selcofoundation.org

Template: [E4H_Weekly_User_Activity_Report_Template.xlsx](#)

Frequency

- Weekly
